The third edition of this text reflects changes in organization and updated entries, making this revision an essential part of any sociology reference collection that aids students, faculty, and librarians in determining the major sources to consult for sociological information. Indexes, bibliographies, handbooks, databases, Web sites, dictionaries, encyclopedias, and other print and electronic information sources fill the book with 610 entries. Covering 1997 to early 2004, each entry gives complete publication information for the resource. Selective works prior to this period (appearing in the previous edition) are included as well. Lengthy annotations provide insight into an item's scope, purpose, authority, and usefulness; consequently, users will save time and energy by referring to this volume instead of trying to discern the information on their own. Chapter 1 includes titles of use in all social sciences studies and to those embarking upon cross-disciplinary studies. Chapter 2 covers general sociological works; chapter 3 contains subspecialties of sociology, including "Gerontology and Aging," "Medical Sociology," "Race and Ethnic Relations," "Social Problems," "Theory," and "Women's Studies." Two indexes (author/title and subject) provide added accessibility to the information.

Summing Up: Recommended. Upper-division undergraduates and above.

Reviewer: [R. Tolley-Stokes](#), East Tennessee State University

Recommendation: Recommended

Readership Level: Upper-division Undergraduates, Graduate Students, Researchers/Faculty, Professionals/Practitioners

Interdisciplinary Subjects:
